Sirius Ganesh

Denver, CO | siriusganesh@outlook.com | (469) 929-1465 | siriusganesh.com

Product operations leader directing a 17-person organization across deployment engineering, customer support, training, and customer success, with a track record of reducing deployment timelines by 85%. Experience spanning startup robotics (Pickle Robot) and scaled AMR operations (Geek+, $40M+ in deployments). Bridges deep technical ownership in computer vision and fleet systems with operational discipline to deliver automation programs reliably.

Professional Experience

Pickle Robot Company — Denver, CO

Director, Product Operations — Sep 2026 – Present

- **Lead 17 people through 3 managers** across deployment, customer support, training, and customer success.
- **Own department P&L and unit economics**: budget, cost-to-serve, deployment margin, and renewals.
- **Define customer success and fleet health metrics** and the dashboards that monitor deployed systems.
- **Lead field engineering for alpha and beta programs** across 8 beta sites, turning field data into product requirements and design review input for next-generation robots.

Manager, Deployment Engineering — Jan 2025 – Aug 2026

- **Managed 7 engineers** delivering **15+ robotic systems** across 9 customer sites; owned hiring and reviews.
- **Reduced site deployment time from 2 weeks to 2 days** by establishing standardized deployment playbooks, networking infrastructure protocols, and customer training programs.

Geek+ Robotics — San Diego, CA

Systems Consultant — Aug 2023 – Jan 2025

- **Advised clients** on deploying advanced mobile robotics solutions, including UPS Happy Returns' **first automated returns hub** (150 robots), reducing return processing times by 35%.
- **Designed and executed testing strategies** for robotic fleet management systems, including RESTful API integrations and User Acceptance Testing, achieving 100% SLA compliance.
- **Developed scalable SOPs and troubleshooting frameworks**, reducing system downtime by 15% across active customer sites.
- **Led cross-functional collaboration** across engineering, support, and customer teams to deliver fleet management solutions from scoping through go-live.

Robotics Deployment Engineer — Aug 2021 – Jul 2023

- **Directed onsite planning and scheduling** for **$40M+** in AMR fleet deployment projects, including a **700+ robot facility** for UPS that optimized storage capacity by 30%.
- **Managed supply chain logistics, installation, and system testing**, delivering projects on schedule against stringent quality and performance benchmarks.
- **Established a train-the-trainer program** for client operations teams, enabling independent fleet management and troubleshooting post-deployment.

Education

University of Illinois Urbana-Champaign

B.S. Engineering Mechanics, Minor in Business

Skills

Leadership	Cross-Functional Team Management, P&L Ownership, Stakeholder Communication, Process Standardization, Strategic Planning, Customer Success Metrics
Robotics	Fleet Management, Computer Vision, SLAM, Edge Computing, ML Model Integration, Sensor Integration, Robotic Automation, Control & Embedded Systems
Systems	Linux, SQL, Python, JavaScript, Git, CI, Cybersecurity, Networking, Integration and Testing
Languages	English, Tamil, Spanish, Hindi, **French, *Marathi (*elementary)*

Societies and Hobbies

American Mensa	Area Coordinator - Champaign County
Espresso	Built siriusganesh.com/coffee to log 250+ shots by bean, roast age, grind, and flow rate; flag prep errors, control for grind changes, and chart each bean's history.
Mountaineering	Climbing all 58 Colorado 14ers (11 completed). Built co-14ers, a route planner with a Python scraping pipeline and a difficulty score that matches 14ers.com rankings (Spearman 0.99).
